

<i>COMPONENT</i>	<i>COMMENTS</i>
Title/Abstract/Keywords	The title of your manuscript is very apt and clear. We have deleted some information from the abstract that is not very essential. Further, we have modified the keywords to make them more relevant.
Introduction Methods Results Discussion	The text of the manuscript has been structured well. However, the Introduction section was longer than necessary. We have made it more concise. In the Methods section, we have made some suggestions on how to further improve your paper. Some data reported in the Discussion section were inconsistent with those reported earlier. We have removed the discrepancy.
Tables/Figures	All tables and figures are positioned correctly. We have recommended some minor changes that need to be made to Figures 2 and 5.
Formatting	We have made extensive changes to the title page. Also, read our comments about the missing information. The list of references is fine.
Editing certificate	We have included a certificate stating that the manuscript has been edited by Editage.
